Tobacco Modification by Salt Addition Disclosure

I have reviewed this disclosure you have prepared to send to the lawyers for their consideration. In general, this document appears to be satisfactory for the purpose it was designed for.

As I am sure you will agree, this write-up is full of generalities, some of which appear to be contradictory. I strongly recommend that after the lawyers have had an opportunity to review this disclosure, you set up a meeting between the lawyers and several selected people from the Research Center to further discuss this disclosure and its implications. This meeting for discussion purposes should be held before the patent people have made any official statements or taken any action on this disclosure.
